The Science of Basel Start-up Companies

Basel, Switzerland - January 20, 2022

AIM OF THE SYMPOSIUM

Creating a new business is hard, and one in the healthcare industry even harder. This symposium aims to demystify what lies behind successfully launching a new business and keeping it sustainable. Through interactive presentations and insightful discussions, the all-day symposium promises to be an effective platform for scientific and business exchange between local startups, the university and pharma companies.

CONFIRMED SPEAKERS *(click on the name to view the LinkedIn profile)*

Keynote lecture:

[Ulf Grawunder](#)

NBE Therapeutics: Next generation antibody-drug conjugates

Early steps to build a successful biotech venture:

[Martyna Wroblewska](#)

BaselArea & BaseLaunch

Financing Case Study:

[Simon Russell](#)

Synendos Therapeutics - Financing a Biotech Start Up: from inception to clinical stage and beyond

Venture Capital Investors:

[Alexander Mayweg](#)

Versant Ventures

[Florian Müllershausen](#)

Novartis Venture Fund

Company Science Presentations:

[Stefanie Flückiger-Manqal](#)

TOLREMO therapeutics: preventing drug resistance in cancer

[Rajwinder Lehal](#)

Cellestia - Targeting Transcription Factors for treating human cancers and auto immune and inflammatory diseases

[Thomas Fessard](#)

SpiroChem: SPEED, SPEED, SPEED: can you synthesize fast(er) please? On the importance of synchronizing discovery chemistry with biotech's aggressive timelines

[Bertolt Kreft](#)

Bright Peak Therapeutics: Developing Next-Generation Cytokine Therapeutics

[Kamal Azzaoui](#)

Saverna Therapeutics: "Regulation of microRNA Biogenesis with Low Molecular Weight Molecules

[Sotirios Sotiriou](#)

FoRx Therapeutics: Targeting DNA replication stress for anticancer therapies

[Owen Wallace](#)

Monte Rosa Therapeutics: Molecular Glue Degraders: From Serendipity to Rational Design
